Summary

Product designer for the platforms that run one of India's largest logistics networks. On Meesho's Valmo network I'm the sole designer behind three products taken from 0→1 to launch: the systems that plan trips, manage transporters, and run vendor contracts, now used by transporters and managers across India. Partnering with product and engineering, I design the operating model, not just the screens. Earlier: 3 years across web, mobile, and design systems.

Professional Experience

Meesho (Valmo Transportation), Product Designer

Jun 2025 – Present

Transporter Panel (live flagship)

- Designed Meesho's unified transporter platform to accept trips, assign vehicles and drivers, track execution, confirm cost, and raise disputes, replacing scattered email and WhatsApp workflows.
- Led the V1→V2 redesign that made completed trips clearer and added Hindi audio for low-literacy partners, lifting cost visibility from ~70% to ~96%.
- Designed the upfront cost-acknowledgement flow, cutting invoice errors from ~20% to under 2% (~₹10 Cr impact).
- Designed the disputes flow to raise, track, and resolve issues in one place, cutting the payout cycle from ~90 to ~7 days (NPS > 60).

TMS Admin: Trip Creation, Placement & Multi-Origin

- Designed the Area Manager admin panel for bulk trip creation, turning managers into active moderators of data quality across ~100 sort centres (97% cost visibility, 99% compliance).
- Redesigned multi-origin trip creation into a simple 2-click route builder, removing two workarounds that were corrupting trip data.

Contract Management: CLH (designing 0→1)

- Designing Valmo's contract-lifecycle system from 0→1, turning route plans into signed, running vendor contracts and replacing an offline spreadsheet process with one auditable source of truth.
- Modeled the full contract lifecycle and designed the CLH manager workspace to assign transporters and rates (with cost guardrails and best-fit suggestions) plus a transporter side to review and accept, across 14 flows and 130+ screens.

Wizrdom, UI/UX & Graphic Designer

Jan 2024 – Jun 2025

- Designed end-to-end UI/UX for client web and mobile products, taking work from research and wireframes through prototypes to high-fidelity, dev-ready handoff.
- Created social, graphic, and motion content for marketing, using performance metrics to refine what shipped.
- Ran multiple projects simultaneously, presenting to stakeholders and mentoring junior designers.

Huntment, UI/UX Designer (Remote, UAE)

Nov 2023 – Jan 2024

- Designed DoJoin Ride, a multi-service app for the UAE market, delivering user flows, wireframes, and hi-fi interfaces across its features.
- Partnered with cross-functional teams to align designs with business goals, running user testing to optimize the experience.

AuraSmart, UI/UX Designer

Jan 2023 – Nov 2023

- Designed smart-home automation app experiences end-to-end, taking them from research and user flows to high-fidelity prototypes.
- Built a reusable design system, running usability testing to validate and refine flows.
- Shaped branding direction and improved UX writing across the product.

OnerosTech, UI/UX Design Intern

Jun 2022 – Aug 2022

- Designed a personal-finance app (loan tracking, bill reminders) from lo-fi to hi-fi, adding micro-interactions to improve usability.
- Researched real usability issues and applied UX principles to the solutions, also designing a sports-betting app interface for clarity and ease of use.

Skills

Design: Interaction Design, Information Architecture, Enterprise / B2B UX, Systems Design, 0→1 Product Discovery, Design Systems & Tokens, Inclusive / Low-Literacy Design, Accessibility, Usability Testing (moderated, multilingual)

Tools: Figma (Variables, Dev Mode, Auto Layout, Plugin API), Interactive HTML prototyping, Adobe Photoshop / Illustrator, Excalidraw / FigJam, Claude Code

Education

M.Des in Experience Design, National Institute of Fashion Technology, Bangalore (2021–2023), CGPA 8.05

B.Tech in Information Technology, VJTI, Mumbai (2014–2018)

Languages: English (professional), Hindi, Marathi (native)
